

HD Digial Satellite Receiver Quick Setup Guide

IMPORTANT. PLEASE READ:

Your Fortec Star HD receiver comes complete with HD Upscaling. This assists in ensuring even Standard Definition broadcasts are viewed at the highest quality possible. If your TV is capable, use the HDMI lead enclosed in the gift box.

CONNECTIONS:

1. Connect HDMI lead (supplied) from satellite receiver to TV. (If your TV does not have an HDMI connection, you will need to use Composite Video/Audio cables or a Scart lead - not supplied)
2. Connect satellite cable from the dish to ANTENNA IN connection.
3. Plug receiver into mains and turn receiver ON. (Press button all the way on front panel. Receiver offers main power cut off by depressing power button fully.)
4. Select Language from initial Welcome Screen.
5. Follow the easy to use menu system to load the receiver with your preferred channels
=>For German viewers - Preset Astra 19.2 (Premiere) Channels are loaded. Press V.Format Button for Premiere Channel list.

USEFUL TIPS:

- ✓ USB Port - Found under the Front Panel flap and on the Back Panel: The USB port makes the Fortec HD receiver perfect for playing your favorite, MP3 files either directly from your MP3 Player or through a USB Stick. Also you are able to connect an external USB Hard drive and record all of your favorite programs.
- ✓ Note: New features are developed for the Fortec HD receiver over time, you may want to upgrade the firmware. This is possible by uploading the correct file from the Fortec Star Website. As well, you can receive information from the HD receiver onto a USB storage devices. For example channel data can be extracted to enable you to design your own channel lists and favorite lists.
- ✓ Over time, we hope to further enhance the features of this receiver. Look for information on www.fortecstar.com, and don't forget to take our survey and tell us what you think!
